

# FEATURED ALUM-A-LIFT CLEAN ROOM OPTICS GRIPPER AND POSITIONER

## PROJECT 26679

**MODEL** A800CRCLR-72

**FEATURING** Powered ripper with adjustable fingers, rotating head, lateral shuttle, and spring overload safety device

**HANDLING** 220 lb [100 kg] Optics

**DETAILS** Optics of many sizes need to be carefully handled during the manufacturing process. This Alum-a-lift allows for secure gripping of the optic by only the edges. The adjustable fingers allow for many different size optics to be handled. The rotating head allows for the optic to be moved between the horizontal and vertical positions. The lateral shuttle helps to align the optic with other equipment. The spring overload safety device helps to reduce the risk of damaging the product when picking and placing it on different surfaces.
