

FEATURED ALUM-A-LIFT
COMBINATION ROLL AND DIE LIFT FOR WEB CONVERTING

PROJECT
27734

MODEL A800CS-94

FEATURING Roller Boom, Hoist Ring Attachments, Enclosed Counterweight

HANDLING 270 lb [122 kg] Rolls and Dies

DETAILS Including flexible, multiple-use equipment is a proven method for adding value and efficiency to your processes!

This multi-talented material handling lift is a perfect match for its companion converting and die cutting machine. Its $\varnothing 3$ " prong includes embedded rollers for the easy loading of large rolls, allowing long run times and minimizing time between changeouts.

When the time comes to change dies, lockable collars slide onto the boom, introducing load rated hoist rings without the need for hand tools.
