

FEATURED ALUM-A-LIFT INVESTMENT CASTING WAX TREE POSITIONER

PROJECT 28421

MODEL A800CS-72

FEATURING Manual wrist, manual linear captivator, manual trunion and soft tread casters

HANDLING 200lb [91 kg] wax trees

DETAILS A jet turbine manufacturer needed a method to manipulate investment casting wax trees. The lift's three degrees of freedom (vertical travel and two axes of rotation) afford the operator to ergonomically access all faces of the wax tree during construction. A set of soft tread casters protect the delicate wax trees from vibrations during transport.
