

# FEATURED ALUM-A-LIFT AUTOMOTIVE FUEL CELL HANDLER

## PROJECT 28768

**MODEL** A800CLR-72

**FEATURING** Removable fixture plate, powered front to back rotation, adjustable rotation stops, safety overload module, key switch lock out

**HANDLING** 220lb [100 kg] Fuel Cell Assemblies

**DETAILS** Hydrogen fuel cells are an assembly of individual components that require specific positioning during build up. This Alum-a-lift provides the operator with control over the process by utilizing adjustments to the height and pitch of the assembly. These adjustments also allow the assembler to work at a more ergonomic posture by bringing the assembly to the most comfortable working position.
