

FEATURED ALUM-A-LIFT
 PHARMACEUTICAL HOPPER INSTALLATION LIFT

PROJECT
29287

MODEL A800CRCS-72

FEATURING Dual width-adjustable boom arms, Swiveling hoist rings, Screw locking lifting straps, Class 1,000 Cleanroom compatibility

HANDLING 700 lb [317 kg] Stainless Steel Hoppers

DETAILS The need to remove large, heavy hoppers from the top of a pill sorting machine for routine cleaning presents risk of harm to personnel and damage to equipment. The presence of this equipment in a cleanroom limits material handling options. Alum-a-Lift provided this simple, compact lift, which includes four lifting straps positioned to engage eye bolts at the corners of the hopper. Hopper removal is now accomplished safely and ergonomically by a single operator.
